

10 Reasons to Use StudyMate

1 Students “Master the Basics”

StudyMate helps students “master the basics” of course material through the use of learning activities, self-assessments and games. It’s ideal for any discipline, especially classes that require students to learn a lot of terminology, facts and core concepts.

2 Integrates with Learning Systems

StudyMate works with the leading learning systems, including Blackboard, ANGEL, Desire2Learn, eCollege, Moodle, Instructure, and Sakai, so activities can easily be made available from an online course.

3 One Template, Many Activities

StudyMate includes simple templates to make entering content easy. Each template generates multiple activities based on the item or question entered.

4 Supports Multiple Learning Styles

With up to a dozen learning activities to choose from, students can select activities based on their preferred learning style. If one student chooses Flash Cards, another student chooses Pick-A-Letter, and a third chooses Fill in the Blank, they all cover the same material.

5 Instructional Flexibility

Not only does StudyMate let students “learn their way”, it gives instructors the flexibility to “teach their way”. Instructors can provide the learning materials themselves, or have students enter the content. Projects can be graded, and the level of facilitation and monitoring is up to the instructor.

6 Save Time by Reusing Content

Existing content is easily brought into StudyMate, from Word files, Respondus 4.0, and other StudyMate projects. The **Respondus Test Bank Network** also integrates with StudyMate, allowing instructors to easily select items from official publisher test banks. With StudyMate, you never have to start from scratch.

7 Collaborative Learning

Depending on the settings for a project, students can add items themselves or edit items from classmates. This means students learn at each step of the process – when creating new items, editing items created by others, or studying with the learning activities themselves.

8 Supports Mobile Learning

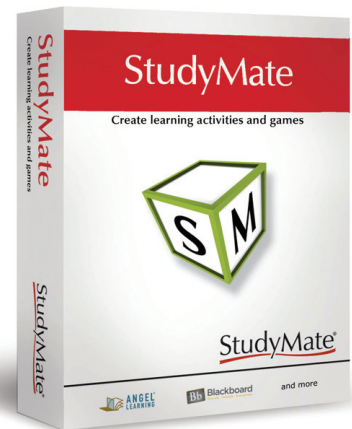

StudyMate allows students to learn anytime and from anywhere – no matter what mobile devices they use. The environment is customized for the iPhone, iPad, Android, BlackBerry, tablets, and more.

9 Easy Training and Rollout

Rollout of StudyMate is easy, with most instructors up and running in minutes. A suite of free training materials is available, including demonstration movies, quick start guides, and live webinars. Help is also available within the StudyMate applications.

10 Great Value, No Risk

StudyMate is a tremendous value (see our website for pricing) and there is no cost for a 3-month pilot. Best of all, a campus-wide license includes both StudyMate Class (the web-based version) and StudyMate Author (the original client-based authoring tool). The two versions let instructors choose the StudyMate technology and approach that best meets their needs.
