

10 Reasons to Use StudyMate Class

1 Students “Master the Basics”

StudyMate Class helps students “master the basics” of course material through the use of learning activities, self-assessments and games. It’s ideal for any discipline, especially classes that require students to learn a lot of terminology, facts and core concepts.

2 Supports Many Learning Styles

StudyMate Class creates multiple learning activities for each item or question entered, allowing students to select activities based on their preferred learning style. If one student chooses Flash Cards, another student chooses Pick-A-Letter, and a third chooses Fill in the Blank, they all cover the same material.

3 Instructional Flexibility

Not only does StudyMate Class let students “learn their way,” it gives instructors the flexibility to “teach their way.” Instructors can create items from scratch, select items from publisher test banks, or have students enter content. Projects can be graded, or not. Even the level of facilitation and monitoring is up to the instructor.

4 Save Time by Reusing Content

Existing content is easily brought into StudyMate Class, such as from Respondus 4.0, StudyMate Author, and other StudyMate Class projects. The **Respondus Test Bank Network** also integrates seamlessly with StudyMate Class, allowing instructors to easily select items from official publisher test banks. With StudyMate Class, you never have to start from scratch.

5 Leverage the Power of Collaborative Learning

Depending on the settings for a project, students can add items themselves or edit items entered by classmates. This means students learn at each step of the process – when creating new items, editing items created by others, or studying with the learning activities themselves. This type of collaborative learning makes classes fun and engaging for students.

6 Easily Copy Questions to the Learning System’s Assessment Tool

With StudyMate Class, instructors can copy student-created questions directly to the assessment tool in the learning management system. This is an exciting way to involve students with course material, and it provides instructors with fresh test questions each term.

7 Seamless Integration with Learning Management Systems

StudyMate Class integrates with Blackboard, ANGEL and the Moodle learning systems, so it works like a native tool. Most users don’t even realize it’s a third-party application. StudyMate Class supports single sign-on and integration with the learning system’s gradebook and assessment engine.

8 Supports Mobile Learning

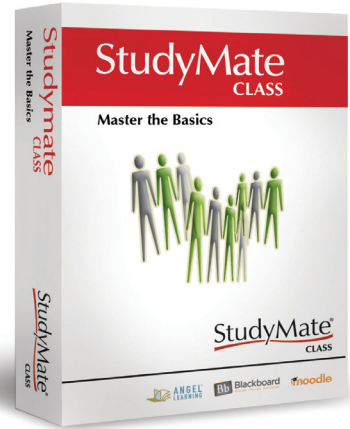

StudyMate Class includes mobile versions that allow students to learn at anytime and from anywhere. The mobile devices supported include the iPhone, BlackBerry, Android, Palm Pre, iPod touch, iPad, and more.

9 Easy Training and Rollout

Rollout of StudyMate Class is easy, with most instructors getting up and running in minutes. A suite of free training materials is available, including demonstration movies, quick start guides, and live webinars. Mouse-over help is also available throughout the StudyMate Class application.

10 Great Value, No Risk

StudyMate Class is a powerful application and a tremendous value (see our website for pricing). There is no software to maintain and no expensive servers to buy. Try a 3-month pilot for free, with no obligation at all. If you purchase StudyMate Class, you’ll additionally receive a campus-wide license of StudyMate Author, the original, client-based version of StudyMate.
